Prof. Shintaro Miyazaki

Faculty of Humanities and Social Sciences
Department of Musicology and Media Studies
Media Science, Digital Media and Computation

Expertise

Prof. Miyazaki, is a critical humanities scholar working on the theory, critique, and history of digital media, digitization, and computation as productive practice. He uses numerous social-critical, philosophical and technology-related theories of the last century (historical materialism, critical theory, poststructuralism, science and technology studies, media theory, media archaeology, postcolonialism, design studies). Currently, Prof. Miyazaki is working on the theory and history of alternative, non-profit, sustainable production practices that could be realized through other types of digitization. The focus is not only on social change, but also on technical-media change, which has no future without critical knowledge of technology.

Scientific Services

Consulting through studies, lectures and talks on current topics in the field of information technologies, algorithms, society, culture and politics with a focus on digitalization, sustainability and criticism. The focus is on the deployment of alternative lifestyles and forms of life in the future, as well as socio-political opportunities to take action.

Testimonials

- Establishment of the Critical Media Lab at the Institute Experimental Design and Media Cultures at the School of Art and Design FHNW (Claudia Mareis).
- Associated Investigator in the Cluster of Excellence "Matters of Activity".
- Publication: "Counter-Dancing Digitality. On Commoning and Computation".
